Cavite City, Cavite, Philippines | (+63) 966-312-7526 | honoriorojas055@gmail.com | [LinkedIn](#)

Summary

Junior Full-Stack Developer with hands-on experience building responsive web and mobile applications for Android and iOS. Proficient in C# .NET for backend development, SQL Server for data storage and management, and Ionic-Angular for frontend development. Experienced in developing end-to-end features, improving both frontend and backend performance, and creating user-friendly interfaces based on client requirements. Comfortable working in both individual and collaborative environments, with direct involvement in client discussions for requirements gathering and system improvements.

Skills

Front-end: Angular, Ionic-Angular, Nebular (Angular UI), JavaScript, TypeScript, Figma

Back-end: C#, .NET 8/9, REST APIs, WebSocket, SQL (queries & scripting), CQRS, Domain-Driven Design (DDD)

Tools & Others: Git, npm, nvm, Visual Studio Code, Visual Studio (2022/2026), SQL Server (2019/2022), Swagger, Azure Blob Storage, Trello

Work Experience

ORD Technology Inc- Mandaluyong

November 2023 - Present

Junior Front-end Developer

Remote

- Developed and maintained responsive, cross-platform web and mobile applications for Android and iOS using Angular and Ionic.
- Translated Figma designs into scalable, high-quality user interfaces with a focus on usability and performance.
- Integrated and managed RESTful APIs to ensure reliable data flow between front-end and back-end systems.
- Engaged directly with clients to discuss feature roadmaps, provide technical input, and help plan upcoming system enhancements.

Junior Full-stack Developer

Remote

- Implemented real-time features using WebSocket, enhancing core functionalities such as messaging and live notifications.
- Designed and implemented request cancellation logic across front-end and back-end, reducing redundant API calls and improving system performance.
- Improved backend efficiency by reducing server memory consumption by approximately 60–70%.
- Planned and structured application data models and data structures based on client requirements, system workflows, and technical discussions.
- Applied Domain-Driven Design (DDD) and CQRS principles to structure backend services, improving maintainability, scalability, and separation of concerns.
- Collaborated with clients and stakeholders to gather requirements, translate business needs into technical solutions, and support long-term system development planning.

Project Contribution

- Piko Philippines - Mobile App ([Android](#) & [iOS](#))
- GigsPh (Beta) - Web [Platform](#) & Mobile App ([iOS](#))
- Your Trusted Business Network (YTBN)
- Happy Hotels Philippines - [Web Platform](#) | Mobile App ([Android](#) & [iOS](#))

- Happy Hotels Admin Portal
- DMCI Homes RAS (Risk Assessment System)
- Wyn Power Corp (Inventory Management System)

Education

San Sebastian College-Recoletos de Cavite

2019 - 2023

Bachelor of Science in Computer Engineering

- Dean's Lister (SY 2020–2021 & SY 2021–2022)
- Capstone Project: IoT Snack Vending Machine
